

Environmental and Energy Policy

The most important aim of SITECH Sp. z o.o. is conscious care for natural environment and respect for energy. We perform our activity in compliance with legal and concern requirements, economic conditions and ideas of balanced development.

We oblige ourselves to reduce the influence of SITECH Sp. z o.o. on the natural environment by:

- optimization of usage of utilities according to the **Think Blue Factory** project and the **idea of balanced development**,
- reduction, reuse, recycling or recovery of produced **waste**,
- rational usage of raw materials, fuels and energy,
- observance of **legal and concern requirements**,
- continuous improvement of technological processes and usage of **the best available techniques** within environmental protection and energy result,
- building of **local partnership** for the environmental protection,
- **involvement** of employees in cooperation for the environmental protection and improvement of qualifications within the environmental protection,
- support of **environment friendly initiatives**,
- realization of aims as well as environmental and energy tasks.

The Board of Directors of SITECH Sp. z o.o. is responsible for the proper implementation of the Policy by providing appropriate resources and means. All employees will be acquainted with the policy and obliged to its observance. The introduced environmental indicators will be used to monitor the efficiency of the environmental and energetic activity.

This Environmental and Energy Policy has been developed with participation of the environmental team and should be reviewed in respect of its adequacy to current needs at least once a year.
